Abstract (en)
[origin: WO0213723A1] The invention concerns a device for collecting seminal fluid, in particular of a boar, having at least a housing (1) designed for receiving a penis an means for causing ejaculation. The invention is characterised in that the means for causing ejaculation consist of means (2) for subjecting the walls of said housing (1) to pulsing designed to stimulate the penis. The invention also concerns an installation for collecting seminal fluid comprising such a device and the use thereof in said installation for collecting boar seminal fluid.
