Abstract (en)
[origin: WO0154822A2] The invention concerns a shower nozzle (1) particularly designed for users desiring improved hygienic conditions, comprising a body (2) consisting of a water supply conduit (5) and a head (6) emerging at its base (9) on a sprayer (3) from which water comes out in jets (4). The invention is characterised in that it comprises means (19, 19') linking the sprayer (3) to the head (6) so as to make it manually detachable without tools and enable its replacement and maintenance. The invention also concerns various structures for the sprayer (3) which can further be provided with means (18) for preventing its being detached by unauthorised and unqualified persons.
