Abstract (en)

[origin: WO0218073A2] The invention relates to an articulated arm transport system, in particular for the automation of press lines and large component transfer presses, characterised by a construction permitting an introduction and extraction of components or workpieces, even with a small clearance between an upper and lower tool.

[origin: WO0218073A2] The invention relates to an articulated arm transport system (43, 44), in particular for the automation of press lines (1) and large component transfer presses, characterised by a construction permitting an introduction and extraction of components or workpieces, even with a small clearance between an upper and lower tool (6, 7).
