Abstract (en)

[origin: WO0217240A1] The invention concerns a device comprising a common personal object and/or clothing item (1) worn by a person, containing data characterising said person and first communication means adapted to transmit a control signal including said characteristic data and second communication means provided in the electrical equipment adapted to retrieve the person's characteristic data and control said equipment in accordance with said characteristic data. The invention is applicable to automated control of an electrical equipment.
