Abstract (en)
[origin: EP1314370A1] Molded shoe inlay (1) made of a material absorbing practically no moisture, incorporates zones (6, 7, 8) with perforations functioning as moisture channels between the top and bottom inlay surfaces. The bottom surface of the inlay is provided with a separate or separable layer of moisture absorbing material. <??>Molded shoe inlay (1) made of a material absorbing practically no moisture, incorporates zones (6, 7, 8) with perforations functioning as moisture channels between the top and bottom inlay surfaces. The bottom surface of the inlay is provided - at least within perforated zones - with a separate or separable layer of moisture absorbing material in the form of a fleece, an open-pore plastic foam, or a mixture of cork and plastics.
