Abstract (en)

[origin: EP1314836A2] The bearing arrangement (2, 10, 11) for supporting the panel holder (6-9) is located outside the holder rotation axis. <??
>The panel mounting device (1) comprises at least one panel holder which is supported by a bearing arrangement allowing it to be rotated about an essentially horizontal axis. The holder can be secured to a lifting device. An Independent claim is also included for a panel mounting method using this device.
