Abstract (en)
[origin: WO0178562A1] The invention concerns children's cutlery, consisting of small-size cutlery (1, 2, 3) adapted to children's hands and whereof the handle (4, 5, 6) comprises embossed elements (9, 11) designed to promote correct position of the user's hand, the knife (1) and the fork (2) being each provided, at the handle end located on the side of cutting edge (7) or the tines (8), with a pattern oriented upwards and designed to receive the tip of the forefinger, the free end of the handle (6) of the spoon (3) being provided with a pattern (11) sufficiently voluminous to prevent the child from gripping it with his whole hand and incite him to hold the spoon from below. The inventive cutlery is designed to be distributed both in specialised commercial networks and superstores as well as in sales networks specialised in articles for children, or as gifts.
