Abstract (en)  
[origin: FR2813378A1] The invention concerns a device for storing pressurised fluid and/or reactors generating pressurised fluids, in particular for motor vehicles, comprising a tank having one or several storage and/or reactor compartments, further including an outer casing (14) which encloses at a distance said tank (1), and spacers forming supports (18, 28), placed in the gap separating the tank from the outer casing and whereof the inner end parts are respectively supported in hollow parts (3, 5) provided in the two opposite surfaces (2a, 2b) of the tank and the outer ends are supported against the inner surface of the outer casing.
