Abstract (en)  
[origin: WO0218837A1] A combustible gas distribution apparatus, suitable for using a plurality of cartridges (C) filled with combustible gas, has a container suitable for receiving the cartridges (C), a plurality of couplings (11) to each of which a respective cartridge (C) is adapted to be connected, a manifold unit (12, 13) connected to the couplings (11) and which by way of a valve conveys the gases of the cartridges (C) towards an outlet of the apparatus. The container is formed of a hollow body (2) and a base (3) which closes the hollow body (2); in the hollow body (2) are fixed the couplings (11), the manifold unit (12, 13) and the valve; the base (3) can be opened for the insertion of the cartridges (C) into the container. Said distribution apparatus is structurally simple, economical in construction, and permits easy installation and removal of the cartridges.
