Abstract (en)
[origin: WO0221738A2] The invention relates to a method and a system for communicating with the internet, whereby at least one communication network and one radio system is used for a connection between a terminal and the internet. The radio system allows the transmission of selected information available on the internet. On the user side, a terminal is provided which comprises a communication device for communicating with the internet via a communication network and devices for receiving and processing the internet information transmitted by the radio system.
