Abstract (en)
[origin: EP1316280A1] A household textile environmental protection bag includes a textile bag body (10) with two surfaces (11, 12, 17), a fixed fastening piece (F1) fixed on one of the surfaces (11, 12, 17), and an article unit (C1, C2) with a fastening piece (F2, F4) that is connected removably to one of the fixed fastening piece (F1) and the movable fastening piece (F3). When the article unit (C1, C2) is removed from the bag body (10), the movable fastening piece (F3) can be connected removably to the fixed fastening piece (F1), thereby preventing the fixed fastening piece (F1) and the movable fastening piece (F3) from contact with a human body. The fastening pieces (F1, F2, F3, F4) may be hook fasteners, loop fasteners, or zipper halves. The article unit (C1, C2) may be a cover, a skirt unit of a bedspread, a dust ruffle, and a furniture shell, such as a back of a sofa and a headboard of a bed. <IMAGE>
