Abstract (en)

[origin: EP1316282A2] Window hanging (1) made of a sheet-like material comprises an upper side (2) for suspending on a horizontal hanging device (3) arranged above a window and a height-adjustable lower side (4). The material is joined on the lower side to a winding roller (5) and wound around this to adjust the height. At least two loops (6) are provided in the region of the upper side for holding the material wound on the winding roll in a raised position. <??>Preferred Features: The sheet-like material is a textile material or a plastic film.
