Abstract (en)  
[origin: EP1316712A2] I.C. engine comprises a crank housing (8) fixed to an oil collecting housing, a lubricating oil pump (10) arranged in the oil collecting housing, and a console fixed to the oil collecting housing and/or the crank housing. The transfer of the fluid from the channel integrated in the console to an oil channel integrated in the crank housing takes place via a connecting support provided with a channel. <??>Preferred Features: The connecting support is screwed to the crank housing and has a bearing surface on which an equalization element is axially adjusted.
