Abstract (en)
[origin: EP1317030A2] The slip ring device has at least one conducting track (10) on a non-conducting board (5) in a stator part (2) and at least one slip ring (4) on a rotor part (3). The conducting track has a solder eye (11) coated with conducting track material for connecting a current or data cable. Conducting wire springs (16) clamped in conductively coated bores have flexible contact shafts (17) pressed against the slip ring by spring force.
