Abstract (en)
[origin: EP1317163A2] The device has a plastic housing (2) of at least two parts (3,4) containing electronic units (5,6) or components that are electrically interconnected. At least one housing part (3) and/or at least a plastic component of an electronic unit inside the housing are in the form of a molded part with integrated conducting tracks (9,10) via which the electronic components or units can be electrically interconnected.
