Abstract (en)

[origin: EP1317164A2] The arrangement has a bearer (14) with at least one electrical light source (20) and a transformer-type receiver coil (15) for placement in the magnetic field of the induction coil (12), whereby the receiver coil is connected to the light source. Several light sources, preferably LEDs, can be used per receiver coil and connected to the receiver coil with alternating polarity. <??>AN Independent claim is also included for the following: an inductive heater with an inventive arrangement.
