Abstract (en)

[origin: WO220407A1] There are disclosed nanocrystalline powdery materials with a TiO₂ content of more than 50 w/w percent, a method for the production of such nanocrystalline powdery materials as well as the application of such nanocrystalline powdery materials as a starting material for the production of chemico-technical or cosmetico-pharmaceutical products, especially of catalysts, colour pigments, ceramic products, products for electroceramic applications, enamels, welding electrodes, cosmetic products, or UV protectants.
