Abstract (en)
[origin: WO0222996A1] The invention relates to a door-operating aggregate, especially for motor vehicles. The basic configuration of said door-operating aggregate comprises a door handle (1), a closing cylinder (3) with a cover (3) and a base plate (4) for supporting at least the closing cylinder, the door handle (1) and optionally, an engaging and disengaging lever apparatus (10, 11, 12) on which the door handle (1) can act and which is connected to a vehicle door lock. According to the invention, the closing cylinder (2), the cover (3) and the base plate with the connected door-handle (1) can be fixed in a relation to each other as individual parts, respectively, with just a single fixing means (13) in the mounted position of the door-operating aggregate.
