Abstract (en)
[origin: EP1188894A1] A glazing support (1) for use in supporting suspended glazing panels (5) comprises a boss (6) having a central through hole (7) for mounting a support bar (8) which is attached to a structural support (10). A number, in this case four, support arms (11), (12), (13), (14) extend from the boss 6. Mounting discs (15), (16), (17), (18) are mounted at the ends of the respective arms (11), (12), (13), (14) and these discs are used as washers in bolting attachment to the glazing panels (5). The boss (6) is of generally frustoconical shape and has four threaded sockets (20) which are equi-spaced circumferentially around the conical portion of the boss 6. Each of the support arms (11), (12), (13), (14) has a spigot (25) at one end for screw threading engagement in a socket (20) of the boss (6). A spigot (30) at an opposite end of the support arm is screw threadingly engagable in a corresponding socket (35) of a mounting disc (15), (16), (17), (18). A kit comprising a single boss type (16), a single arm type (11,12,13,14,) and a number of different (15,16,17,18) mounting discs may be used to assemble either on site or off site, appropriate glazing supports for a given structure. <IMAGE>
