Abstract (en)
[origin: WO0220977A1] The invention relates to an oil drain connector, in particular for a common-rail system or a common-rail injector, for connecting an oil drain line (2) to a connector end-piece (4) by means of a connecting channel (3). The oil drain connector (1) comprises an at least partially annular-shaped channel on a component on one external circumference in which the oil drain connection is provided, in to which the connecting channel (3), for connection to the drain oil line (2), opens. The annular channel (5) is connected to the connector end-piece (4) by means of a connector element (6).
