Abstract (en)

[origin: WO0223555A1] The invention concerns a storage installation comprising: a room (1) provided with a floor (2), a ceiling (3) and side walls (4, 5); housing means (6) for receiving the irradiated fuel or radioactive materials, said housing means (6) being arranged in the room so as to be subjected to the flow of a cooling gas fluid; means for introducing gas fluid (24) into the room to input said cooling gas fluid; means for evacuating the gas fluid (25) outside the room to evacuate said cooling gas fluid after it has been circulated on the housing means; means (8, 9, 19) for channelling said cooling gas fluid to provide it with a privileged direction of flow when it circulates over the housing means.
