Abstract (en)

[origin: WO223858A1] The invention relates to a method for checking the compliance of a bluetooth device (110) for testing, in which the interface for the "Logic Link Control and Adaptation Protocol" (L2CAP) (112) with higher layers of the Bluetooth-Protocol stack are tested. The L2CAP (112) is placed in a test mode, such that messages for higher layers are diverted to a test device (10), the L2CAP (112) being placed in a test mode by means of a bluetooth message.
