Abstract (en)

[origin: EP1317979A1] Process for calibrating a mold (1), especially in the form of a tube or block, comprises: reinforcing the mold in its end regions before calibration by build-up welding in the wall thickness; filling the holes (5) in the mold wall with a flowable material; and sealing at the ends. Calibration can be then be carried out. <??>Preferred Features: The holes are filled with an incompressible material and/or bulk material. The holes have a circular cross-section.
