Abstract (en)
[origin: EP1317996A1] Wrench tool comprises a handle (1), a clamp clip (3) which can pivot on one end (9) using a bearing device on the handle and is bent on the other end (11) away from the handle, and a clamping jaw (4) which can move on the handle. The bearing device is formed so that it can receive one end of the clamping clip. <??>Preferred Features: The bearing device has a first bearing (10) on one end of the clamping clip which is the concave side of the clip and a second bearing on one end of the clamping clip which is the convex side of the clip.
