Abstract (en)

The web of material (1) already possessing a printed layer with register-marks and control lines is measured for length by means of a measure (2) between two or more register marks. The web of material is set at the required register length between two or more pulley-groups (4,4a). The web is controlled especially by a register control by means of a register roller (6) in front of a first printer (7).

Abstract (de)

Die Erfindung betrifft ein Verfahren zum passergenauen Drucken von Multilayer-Aufbauten, durch Verwendung einer Registersteuerung und Anpassung des Längsregisters zwischen Zuggruppen. Ferner werden nach diesem Verfahren hergestellte Produkte und deren Verwendung beschrieben. <IMAGE>
