Abstract (en)
[origin: EP1318264A2] The support (10) for a glass pane assembly (11) or panel, in a window or door frame (20), has a carrier (12) along its complete length. The carrier is encapsulated in a flexible and soft plastics to form a covering layer. The carrier is of metal, to increase the load bearing performance of the support. The carrier and its encapsulation are produced separately to be fitted together in the window/door assembly.
