Abstract (en)

[origin: EP1318569A1] The current socket has a cap (110) with a front wall (112) and two holes. There is an obscurer above the contact elements moving between open and closed positions. The obscurer has two inclined surfaces (131A,131B) positioned facing the holes. There is a drive pin (117) acting on the obscurer faces (134,134A) allowing the obscurer to open. The drive pin forms a single block with the cap.
