Abstract (en)  
[origin: EP1318675A2] The invention provides a display apparatus with a speaker unit which is generally small in depthwise dimension but can generate sound of a good quality from the speaker unit. A television receiver as a display apparatus includes a plasma display panel, a front panel having an opening through which a display face of the plasma display panel is exposed, a back cover attached to the front panel for covering the back of the plasma display panel, and speaker units disposed between the front panel and the back cover. The television receiver further includes a partition wall plate for covering the back of the display panel such that a space is formed between the partition wall plate and the back cover, and each of the speaker unit is disposed in the space. <IMAGE>
