Abstract (en)

[origin: WO0221952A1] The invention concerns a mail chain protective glove consisting of a part (2) designed to cover the hand, extended by a full sleeve-like part (3) devoid of lateral slot, designed to be urged to cover part of the wrist zone, which wrist portion (3) is extended optionally by a cuff (4) protecting the forearm or the arm, likewise in the shape of a full sleeve devoid of lateral slot . Said glove provided with a fastening system (5) on the portion (3) covering the wrist and/or on the protective cuff (4). The invention is characterised in that the binding system (5) consists of a hook member (6) which co-operates with at least an orifice (8) provided in a catching structure (9), which hook member (8) is provided with a projecting element (12) which forms a gripping means facilitating the fastening manoeuvre on the receiving structure (9), as well as the unfastening manoeuvre.
