Abstract (en)

[origin: EP1319360A1] Domestic dishwasher machine, with a front loading door (3), wherein the detergent measuring/dispensing device (15) is housed in the washing chamber (1) and is supported by the upper rack (16) in a dead zone thereof, wherein the withdrawal of the detergent takes place with the entry of a decalcified water flow into the device (15), at the start of a washing step, and an additive measuring/dispensing device (13), with the relative reservoir (12), is housed in the interspace between a side wall of the washing chamber and a corresponding outer wall, so that the counterdoor (7) for closing the washing chamber, free from the presence of these devices, is drawn into recess for the whole of its height and increases the useful volume of the washing chamber. <IMAGE>
