Abstract (en)

[origin: EP1319506A2] The stacker has air outlet apertures (20) between the sheet guide plates (10) and the deflecting device (13), and are connected to the suction side of the air preparation unit in a region spaced away from the dusting device (8). The treated air goes to a sheet (17) through the air outlet apertures. Other apertures are connected to the central suction system.
