Abstract (en)

[origin: EP1319601A2] Labeling arrangement (11, 12) comprises a support layer on which a sticky label layer is mounted. The label layer has stampings defining the labels (110, 120). Separating stampings (16, 17, 24, 25) in both label and support layer are used for splitting off the individual labels. Alignment stampings (18, 19, 26, 27) in both support and label layer are for alignment of the labels, while segment stampings (21, 29) in the label layer are to simplify separation of the support layer. <??>The invention also relates to a corresponding method and self-adhesive label paper stamped according to the invention.
