Abstract (en)

[origin: EP1319769A2] The roof insulation board has an upper side (1) to support the roof tiles. The under side (2) of the board has at least one mounting recess (3) to suspend the board on a roof batten. The mounting recess is cut back for the roof batten (4), to engage in it with a section at an acute angle. The mounting recess runs across the whole width of the board, with a rectangular cross section, and the cut-back has an acute angle at one right angled side at an angle of 25-40 degrees and preferably 25-35 degrees .
