Abstract (en)

[origin: EP1320152A2] The arrangement has an elongated light source (2) with a socket at both ends. The light source can be rotated about its longitudinal axis and each socket of the source is held in a holder of a device for mounting the light source with a rotatable shaft and a flexible electrical conductor enclosing the shaft in a spiral form. <??>AN Independent claim is also included for a device for mounting an elongated radiation source and transferring electrical energy to a connecting cable leading from each of two end sockets.
