Abstract (en)

[origin: EP1320282A2] The method involves freely setting or programming the time at which the recording is made and/or a recording frequency as well as the information to be recorded, such as the data and/or parameters and/or the settings of the hearing aid. The time of recording can be triggered or altered manually or event-driven <??>AN Independent claim is also included for the following: a hearing aid and a binaural hearing aid.
