Abstract (en)
[origin: US2005115280A1] A garment of a stretch fabric knit in a fine-meshed manner, particularly a pair of cycling pants, comprises a front part (10) and a rear part (12). The front part (10) and the rear part (12) are knit simultaneously. Along at least one connecting edge (14,18), the front part is knit together with the rear part in a seamless manner. Thus, a seamless garment is manufactured. Since the garment does not have any bead-like seams, the occurrence of pressure marks and chafes caused by the seams is avoided.
