Abstract (en)
[origin: WO0226077A1] The invention concerns a rucksack comprising a frame (1) arranged, at least in the central part (11), in the half-thickness (Ep) which includes the front face (101). The front face (101) is positioned opposite to the rear face (100) which is designed to be positioned on the user's back. The rucksack also comprises a compression system (20) which tends, at least in the central part (112), to press the rear face (100) towards the frame (1).
