Abstract (en)

[origin: WO0224136A1] The invention relates to briefs (400; 500) for supporting an absorbent article, said briefs being designed with a front portion, a rear portion and an intermediate crotch portion and having two leg openings and a waist opening, and said briefs comprising a fastening member (401; 501a, b) which is arranged to cooperate with a corresponding fastening member (325; 326) on an absorbent article for the purpose of securing the article in the briefs (400; 500). The fastening member arranged in the briefs has a surface provided with fastening loops (405; 505), said fastening loops (405; 505) being designed to cooperate with a fastening member comprising hook members, and said fastening loops (405; 505) being arranged in a number of chain-like rows of loops (505), each formed by a continuous thread which penetrates through a layered carrier material (402; 502).
