Abstract (en)

[origin: WO0222349A1] The invention relates to an assembly and/or monitoring device (1) and a method of operating the same for folding containers (2), in particular made from plastic formed pieces with a base section (3) and fixable longitudinal and transverse side walls (4, 5), with a transport device (11) for the transport of the folding container (2). Assembly devices (17) and fixing devices (24) are provided in a positioning and/or assembly station (14). A monitoring device (26) is arranged after the positioning and/or assembly station (14) in the transport direction (13) of the folding container (2). The fixing device (24) and/or monitoring device (26) is/are arranged on a support device (18). Said device may be adjusted by means of a vertical guide device (19) and a height adjustment device (20), from a transport plane (16) formed by the transport device (11) to a direction perpendicular to the above.
