Abstract (en)

[origin: WO0226596A1] The invention relates to an assembly of at least one waste container such as, for instance, an OTTO-waste container, and a housing in which the waste container is fittingly received with some clearance, the waste container being provided with a first cover for opening and closing the waste container, the housing being provided with a second cover for opening and closing the housing, the housing being provided with an opening for receiving the waste container in the housing, the opening extending along a rear side and an underside, the housing being provided with at least one wheel, the at least one wheel being positioned such that the housing is at least mobile in a direction being substantially at right angles to the rear side of the housing. The invention also relates to a housing of the assembly according to the invention. The invention further relates to a method for the use of the assembly according to the invention.
