Abstract (en)
[origin: WO0225099A1] The invention relates to a valve arrangement, particularly for internal combustion engines operated with heavy oil or diesel and functioning with receiver-type pressure injection. The discharge valve is associated with the pressure accumulator which is impinged upon in the direction of the closing position thereof via the pressure arising in the accumulator.
[origin: WO0225099A1] The invention relates to a valve arrangement (2), particularly for internal combustion engines operated with heavy oil or diesel and functioning with receiver-type pressure injection. The discharge valve (5) is associated with the pressure accumulator (1) which is impinged upon in the direction of the closing position thereof via the pressure arising in the accumulator.
