Abstract (en)

Protection element (10) for footwear such as a ski boot, snowboarding boot, trekking boot or suchlike, having an upper (12) equipped with a front aperture (13) lying substantially on a median longitudinal axis ("X"). The protection element (10) comprises a shaped tongue (17) arranged above the front aperture (13) and having a first end attached to the upper (12) by means of first attachment means (18). Elastic means (20) are superimposed above the tongue (17) and are attached to the upper (12) by means of the first attachment means (18) and by means of second attachment means (26) arranged in two attachment zones substantially equidistant from the median longitudinal axis ("X"), in order to keep the tongue (17) aligned with the median longitudinal axis ("X"). <IMAGE>
