Abstract (en)

[origin: EP1321373A1] The opening/closing system consists of two lengthwise elements a base (11) fastened to the bag on either side of its opening, and a slider (12) that engages with the base in the closed position and separates from it to reveal the opening. The base and slider engage by a system of grooves and projections (30), and the slider has a tab (34, 35) at each end for pulling it open and closed.
