Abstract (en)

[origin: EP1321381A1] The present invention comprises a unitary flexible package (10) for enclosing and containing in a sealed condition one or more compressible products (100) in both a compressed and uncompressed condition. The package (10) comprises a first closure member (12) capable of sealing the package (10) in a first closed condition defining a first volume, and a second closure member (14) capable of sealing the package (10) in a second closed condition defining a second volume, the second volume being greater than the first volume. A method for making the package (10) of the present invention is also disclosed. <IMAGE>
