Abstract (en)

[origin: EP1321414A1] A panel (1) has a predetermined number of floor buttons (CCB) at its front side for generating hall calls or car call commands on activation of single button or combination of buttons (3). A converter button (H) or a sensor converts the panel from normal mode to converted mode, so that all floors are selectable by a decade keyboard. <??>An Independent claim is also included for method of operating a panel in lift installation.
