Abstract (en)

[origin: EP1321415A1] The access door (2) to a lift (3) in a building (1) is fitted with an electrical closing or locking system (10) which is operated by a remote-control device (19,20) on the control panel inside the lift cabin (8). A long-distance alarm appliance (13) calls for help outside the building. When verbal communication is established, the electrical closing or locking system is operated,
