Abstract (en)

[origin: EP1321583A1] The invention relates to a slurry wall cutting device with a mast, on which is vertically movably suspended a cutting tool by means of a retaining cable and which is connected to at least one supply hose and at least one disposal hose. For improving guidance a suspension slide is provided, which is vertically displaceably guided on the mast. On the suspension slide are provided an articulation for the retaining cable and a first hose guide pulley for the supply hose and a second hose guide pulley for the disposal hose.
