Abstract (en)

The door-leaf or window-casement (2) tilts on a horizontal axis in relation to a frame (1), and turns on a vertical axis. The hasp (22) is swivel-mounted on the casement's/leaf's and or pivot bearing's bearing part, at right angles to the axis of the pivot bearing fixed to the frame. A support element (27) supports the hasp in relation to the bearing part. and is fixed to the leaf/casement or frame. The hasp restricts the extent to which the leaf/casement is projected in relation to the frame.

Abstract (de)

Bei einem Drehkippfenster mit einem Ausstellarm (22) zur Abstützung eines Flügels (2) gegenüber einem Rahmen (1) in einer Kippstellung ist auf einer Stulpschiene (14) ein gabelförmiges Stützelement (27) befestigt. Das Stützelement (27) umgreift den Ausstellarm (22) in einer Drehstellung. Das Drehkippfenster ist besonders einfach aufgebaut. <IMAGE>
