Abstract (en)

[origin: EP1321622A2] Coupling device for a blind comprises a folding coupling (17) in the form of a multihinge chain connecting the preferably electromotor-driven tilting devices (8) of neighboring blinds. The tilting devices are provided on at least one side of the slats and connect each individual blind to each other so that the slats of neighboring blinds tilt together. <??>An Independent claim is also included for a blind arrangement comprising the coupling device for two or more neighboring blinds. Preferred Features: The multihinge chain is a three hinge chain preferably with four hinge parts (17a, b) and three axes (18). The tilting device is a push rod.
