Abstract (en)

[origin: EP1321833A1] Watch comprises a movement (2) topped by a face (4) with a circular encasement (12) that is itself enclosed by a housing (14) with a glass cover (16) and frame. The housing has an internal tubular part (38) that surrounds, at least partially, the circular encasement and that is itself surrounded by the outer circular frame (24) and assembly elements. The inner tubular part is designed to allow positioning of the outer circular frame relative to the circular encasement at any angular position.
